

Celtech Smart Doorlock

Security starts at your front door

Our smart doorlock gives you a peace of mind by letting you monitor who goes in and out of your home while you're away. You can also set temporary passcodes for visitors, or even remotely unlock your door to let someone in.

Our doorlock comes with 128bit-AES Encryption to prevent hackers from entering your home.

6 Unlock Methods

The image shows a sleek black smart doorlock with a digital keypad. To its right, a grey box lists six unlock methods with corresponding icons: Fingerprint (a fingerprint), Card (a card being swiped), PIN (a keypad with asterisks), Key (a physical key), Smart App (a smartphone), and Temporary PIN (a keypad with asterisks and a clock icon).

World's No 1 Smart Home App

The image depicts a person's hands holding a smartphone displaying a smart home app interface. The background shows a modern living room with various smart home devices: a TV, a robot vacuum, a smart light bulb, a smart speaker, a smart roller blind, and a smart camera. A blue banner at the top reads "World's No 1 Smart Home App".

Built-in Wifi

Control your lock from your App
Anywhere & Anytime

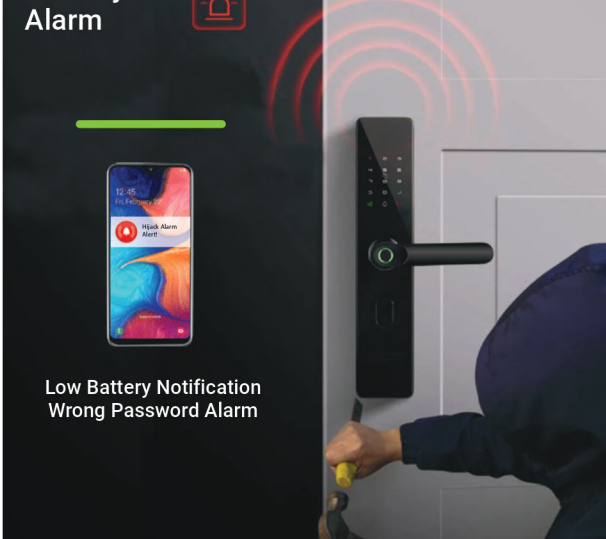

Features:

- Remotely Unlock
- Generate One Time PIN Code
- Temporary Password for Airbnb
- Log report with Timestamp

The image shows a man in a light blue shirt looking at his smartphone. In the background, a smart doorlock is mounted on a door. A semi-transparent box contains the text "Built-in Wifi" and "Control your lock from your App Anywhere & Anytime". Below this, a list of features is provided.

Anti-Hijack Alarm

The image shows a smart doorlock with a red alarm light icon and a smartphone displaying a "Wifi Alarm Alert" notification. A person in a dark hoodie is shown using a tool to attempt to pry the doorlock. A green progress bar is visible above the smartphone. Below the image, the text "Low Battery Notification" and "Wrong Password Alarm" is displayed.

IMF Scratch Proof

The image is a close-up of the smart doorlock's keypad and handle. A white line points to the keypad area, which is labeled "IMF Scratch Proof". The keypad has several icons and a small green light.

Suitable for Wooden and Security Doors

FULL SUS304
Stainless Steel

Highest Grade
Class-C Cylinder

The image shows the internal mechanism of the smart doorlock, highlighting the stainless steel body and the Class-C cylinder. The text "FULL SUS304 Stainless Steel" and "Highest Grade Class-C Cylinder" is displayed.
